WORK EXPERIENCE

Software Developer

HCL TECH

9/2022 - Present,

Mumbai, IN

Achievements/Tasks

- Collaborated with quality engineers, product management, design, and support teams to ensure quality in all phases of development.
- Managing and refactoring the codebase of web-based projects and migrating the old codebase to the newer version.
- Refactored and fixed bugs in more than 8 web service modules.
- JIRA & CI/CD knowledge

PROJECTS

E-commerce portal using Spring-Boot

- Used the Java Spring-Boot Web Framework, Angular and MYSQL Database to implement an E-commerce portal.
- Added features like Login, Signup, search for products, cart, checkout, and integrated payment gateway.

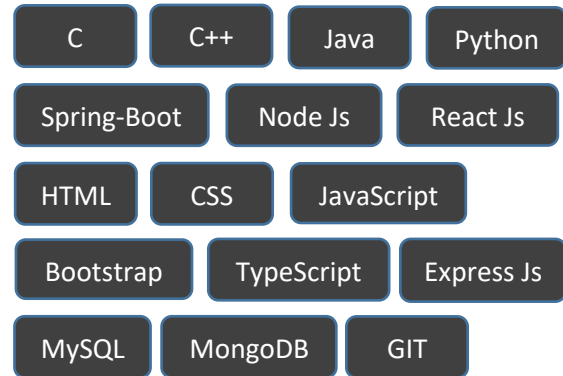

MERN Stack Notes Keeper App

- Developed a notes Keeper application using the MERN stack. The application allows users to create, edit, delete, and search notes.
- Used Express framework to create the RESTful APIs that the React frontend interacts with.
- Used Bootstrap components in React frontend to create a user-friendly interface.

Agriculture Management System

- Used the Java Spring-Boot Web API, Angular and MYSQL Database to implement an Agriculture Management System.
- Implemented CRUD operations and added features like Login, Signup, search for crops, upcoming meetings held by agriculture department, User Query resolution feature, etc.
