SGGS Institute of Engineering & Technology
BTech. in Electronics & Tele-communication Engineering (CGPA: 9.01/10)

Nanded, IN
2018 – 2022

G.B.M.M Jr College
High School; Computer Science (92%)

Hinganghat, IN
2017 – 2018

EXPERIENCE

HCL TECH

Client: Nomura Holdings Inc

Sept 2022 - Present

Software Engineer

- Spearheaded the development of budgeting applications, contributing to both frontend and backend functionalities using SpringBoot and React Js, delivering over 20+ features for Nomura's Profile Management System.
- Ensured end-to-end quality in development processes by actively collaborating with quality engineers and support teams.
- Designed and implemented a robust Services and UI Health Checker Web Application using Spring Boot, JPA, and Thymeleaf templating engine, enhancing system performance monitoring and ensuring seamless service functionality.
- Developed a Messaging Queue status checker module with Spring-boot for a Liquidity projection tool application, contributing to improved operational efficiency.
- Successfully configured and deployed an application on a production Linux Server in collaboration with a cross-functional team. Proficiently executed fundamental Linux commands and played a key role in Jenkins build and deployment processes, contributing to efficient development and project delivery.
- Managed and refactored the codebase of web-based projects, leading the migration from the old codebase to the newer version. Resolved bugs in more than 8 web service modules, ensuring improved functionality and stability.

SKILLS & INTERESTS

Skills: JAVA, Python, C++, Spring Boot, Node Js, React Js, Bootstrap, TypeScript, Express Js, SQL, MongoDB

Tools: Source & Version Control (Git, Gitlab & Github), Linux Environments, REST APIs.

Interests: Flutter & React Native

PROJECTS

E-commerce portal using Spring-Boot

- Used the Java Spring-Boot Web Framework, React and MYSQL Database to implement an Ecommerce portal.
- Added features like Login, Signup, search for products, Product filters, cart, checkout, and integrated payment gateway.

MERN Stack Notes Keeper App

- Developed a notes Keeper application using the MERN stack. The application allows users to create, edit, delete, and search notes.
- Utilized the Express framework to develop RESTful APIs, facilitating seamless interaction between React and the backend services.
- Used Bootstrap components in React frontend to create a user-friendly interface.

Agriculture Management System

- Used the Java Spring-Boot Web API, React and MYSQL Database to implement an Agriculture Management System.
- Implemented CRUD operations and added features like Login, Signup, search for crops, upcoming meetings held by agriculture department, User Query resolution feature, etc

VOLUNTEER EXPERIENCE

- Worked as a **Magazine Designing Team Head** DRISHTI-2020 (An Official Magazine of SGGSIE&T).
- Worked as a **Web Development Team Main Coordinator** of Zenith-2020 (Sports Event of SGGSIE&T).
